One Day Workshop

Collision Investigation and Prevention

SoRSA Safety Day 2017, supported by BEAR Scotland

9.00am - 4pm, Friday 6 October, Forth Replacement Crossing Contact and Education Centre, Queensferry

The Society of Road Safety Auditors, supported by BEAR Scotland Ltd and Transport Scotland, presents a one day Collision Investigation and Prevention Workshop aimed at new and experienced Road Safety Engineers.

Understanding how collisions occur and their outcome is a significant part of road safety engineering and helps us develop ways in which to reduce incidents and casualty severity.

This one day workshop is aimed at road safety engineers to provide them with a better understanding of the causes, mechanics and outcomes of road traffic collisions. It will include inputs from Road Safety Professionals in Transport Scotland, SoRSA and Collision Investigators from Police Scotland.

Who Should Attend? Road Safety Engineers of all levels from the Public and Private Sectors.

Held at: The Forth Replacement Crossing Contact and Education Centre, Queensferry, EH30 9SF.

Nearest railway station is Dalmeny, free car and cycle parking is available.

Places cost £50 per delegate and all booking is through Eventbrite below.

The attendees will qualify for a full day of CPD accredited by the CIHT.

For more information contact Eric Hill at BEAR Scotland on:
